HaraViba
— Green Goes Global —

ABOUT US

- ✿ HaraViba offers 100% natural, 100% eco friendly, 100% compostable and 100% biodegradable rigid packaging solutions made from sugarcane bagasse that breaks down easily in natural environments and industrial composting facilities.
- ✿ Our biobased and compostable pulp fiber moulded range for the tableware and take-away food industry includes plates, trays, cups, cutlery, clamshells, takeaway boxes, drink cups, drink lids, pizza boxes and other practical food-service solutions made from plant fibers.
- ✿ Our technology helps protect food against oil, water and oxygen while reducing the need for single-use plastics. Plant based fiber products are microwave safe and oven safe, and are designed to be recyclable, compostable and biodegradable.
- ✿ We use scientific testing methods and quality processes so that our products meet global standards and certifications.
- ✿ Our products reflect our commitment to sustainability: they are fully compostable, annually renewable, made from agro waste, and created as a true eco-friendly solution for the environment.
